Comprehensive services from one source

The GICON Group offers a wide variety of products and services. If necessary, the more than 600 full-time employees will join forces across all technical departments. The overall skills are thus supplemented and the client receives all desired services from one source.

ENERGY EFFICIENCY

**Consulting
Planning
Management**

ENERGY EFFICIENCY CONSULTING, ENERGY AUDIT IN ACCORDANCE WITH DIN EN 16247-1

From initial meeting to recommendation on specific implementation measures, GICON® provides the following services for energy efficiency consulting:

- Energy consumption analysis in conjunction with metrological investigations
- Identification of weak spots and potential saving opportunities in terms of energy-efficiency
- Development of measures aiming at the reduction of energy consumption and energy costs
- Profitability analyses
- Subsidy consultancy and support in the application process
- Issuing of the Saxonian Industrial Energy Certificate

**We will be pleased to advise you.

ENERGY MANAGEMENT SYSTEMS

GICON® develops management systems and integrates these in your existing company structures. If required, the implemented system is continuously supported by our staff.

- Introduction of management systems with a focus on energy (ISO 50001, EMAS or ISO 14001)
- Training for technical and commercial staff
- Conception on energy data controlling
- Implementation of software solutions developed in-house (CoCheck) for selected industrial sectors
- Individual services such as legal management and environmental statements

For selected industrial sectors, GICON®'s in-house developed CoCheck Compliance Check software solution can be integrated. CoCheck supports during:

- Documentation of all activities within the framework of energy action plans, corrective and preventative measures
- Definitive recording of performance specifications and consumption for object and energy sources
- Reporting for energy consumers and performance indicators

* realisable with the CoCheck - Compliance Check software system

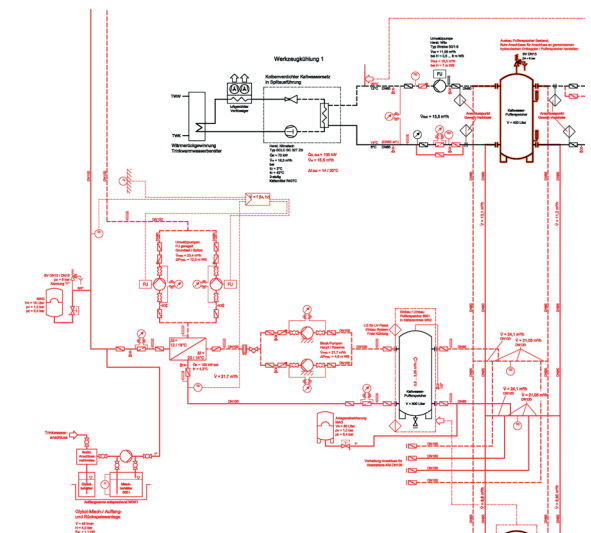

PLANNING AND CONCEPTION

GICON® supports you in the implementation of energy efficiency measures and develops higher-level energy concepts.

- Energy and climate protection concepts
- Energy supply concepts for commercial/industrial sites
- Market and feasibility analyses
- Project development

Planning services

- All work phases (HOAI)
- Variant studies and alternative solutions
- Cost analysis (investment and operating costs)
